“Chris and Ian are, but are you sure you’re not Overpaying?”

- **Removed extraneous features and services**
- **Leveraged new pricing structures**
- **Savings realized within first month**

\$7,000 Total Savings
56% Monthly Internet and Phone Expense Reduction

Karl was introduced to us 3 years ago by a close friend and he has supported our network ever since. He understands the importance of our time and keeping our network up so he conducts the majority of his work off hours so there is no business interruption.

Karl recently introduced us to another service he is providing, “cost efficiency analysis” as he called it. He explained that he was advocating on behalf of his clients with their existing telecom vendors in an effort to save us money and improve service.

Without us having to lift a finger he was able to reduce our monthly telecom bill by 56%.

No time or money spent on our part, and a drastic cost reduction.

I’d highly recommend this service to anybody with a phone bill.

Sincerely,

Chris P. Fiore, Esquire

 Harleysville, PA

- **Consolidated Telecom Services**
- **Implemented hosted VoIP Telephone System**
- **Renegotiated Business Pricing**

\$19,800 Total Savings
52% Monthly Internet and Phone Expense Reduction

Our firm is growing and we want to be able to use technology to our advantage. FuzeIT Solutions has been supporting us for more than 5 years and has always guided our investments in technology. Recently, they conducted a review of our telecom expenses in conjunction with guiding our transition to a hosted VoIP phone system. They were able to

Cut our phone bill by \$350 per month

and also reworked our Internet so it was 4 times faster and actually cost us \$60 less per month.

As wealth management consultants we strive to help our clients grow financially so I greatly appreciate Karl’s attention to cost while providing service.

Sincerely,

Ian Meierdiercks
